

Bluetooth 2D Pocket barcode scanner

Quick Guide

Model no.: iDC9607LW

Introduction

Designed primarily for P.O.S. retail environments, the iDC9607LW is a Bluetooth pocket barcode scanner that allows you to scan various barcoded items. Its in-built excellent 2D engine allows you to reliably read 1D / 2D barcodes on various shapes and is a great space-saver for busy or limited workspaces. It supports iOS, Android, and Windows devices through Bluetooth HID or SPP communication.

Delivery content

- * Pocket Barcode scanner + Strap x 1
- * Mini USB cable x 1 (charged by original USB power adapter)
- * Quick instructions x 1
- * Glove set (Glove + Holder + Ring Trigger Cable) x 1set

Limited Warranty

Riotec provide one-year limited warranty. Riotec will not warranty any product which has been subjected to improper usage, neglect or unauthorized repair or installation. Besides, warranty does not cover the faulty usages or consumable parts. (Cable & battery are consumable.)

Safety instructions

Read the operating instructions carefully and especially observe the safety information. If you do not follow the safety instructions and information on proper handling in this manual, we assume no liability for any resulting personal injury or damage to property.

- * Don't put scanner in places excessively high temperatures, such as expose under direct sunlight
- * Don't use scanner in extremely humid area or drastic temperature change
- * The rechargeable battery is permanently built into the product and cannot be replaced.
- * Never damage the rechargeable battery. Damaging the casing of the rechargeable battery might cause an explosion or a fire!

Operating elements

** Please switch ON and charge scanner for 3~4 hours at first time before use.

- ** In the beginning, you must press the orange trigger button for 8 seconds to turn on the pocket barcode scanner. Then, press it for scanning barcodes & waking up from sleeping mode.
- ** If you won't use pocket scanner for quite a long time, you can press 2 grey buttons to enter "Deep Sleep Mode" (like turn-off).

How to assemble Glove set (Glove, Holder, Ring Trigger cable)

How to Connect to Smartphone or Tablet

1. Make sure your device supports BT HID or BT SPP profile
 2. Turn off Power-Saving mode on your smartphone/tablet first
 3. Then, choose HID or SPP device before connecting to smartphone/tablet.
- If you don't know what profile your device is, please try HID profile first, then, SPP profile.

1. Main MENU

```
MAIN> S 12:52
Direct-scan
Memory-scan
Upload
↑ ENTER ↓
```

2. select Setup

```
MAIN> S 12:52

B3. Setting ... Completed.

```
Setting ...
Completed!!!
```

After you select what you want, press the orange button to enter the next or ESC button back to the previous.

(example: pairing with iPhone)

4. Please complete the connection procedures as the above photos.
5. After the connection is completed, the RED light will be **OFF**.
6. Please open WordPad or appropriate APP, then, scan the barcodes and the barcode data will show on the cursor site.

Notes:

- * This product complies with Bluetooth standards. This device that communicated with this product must support the same SPP or HID.
- For other Bluetooth devices with other profiles we cannot guarantee a connection before the product has been tested.
- * The communication speed and range of the product may vary due to obstacles and radio wave condition between the product and device to which it is connected. Condition on the host device may also affect the communication speed and range of the scanner.

LED Indicator Information

Orange LED ON	Full charged
Orange LED Flashing	Charging / Low battery
Red LED ON	Offline / out of service
Green LED ON	Good read
Orange LED ON	Good read (Batch mode)

Remark:

- * When the battery power is too low, the Orange LED will flash and beep once. Scanner should be charged immediately.
- * In case the power consumed out totally; the RTC (Real Time Clock) will back to original setting 01012000.
- * If scanner shuts down, it is recommended to charge it fully before turning it on.
- * Under power-saving mode, there will not be LED indication when charging.

Soft-Keyboard setting code for Android / iOS

For Android

For iOS

- * Under Android system:
If you want to raise/lower On-screen keyboard, please read the above setting code first. Then, press left button for 2 seconds to activate it. (LED is RED /Bluetooth is offline), press it again to lower keyboard (LED is off/ Bluetooth is online).
*It will take 5~10 seconds to make BT online/offline.
*When BT is offline, scanning function is stopped.
- * Under iOS system:
Please read the above setting code first. Then, press left button for 2 seconds to raise/lower On-screen keyboard;

Reset Configuration to Defaults

(scan from A1 to A4 for HID profile or B1 to B5 for SPP profile)

There are two operating modes on the scanner

1. Direct-scan Mode

1. select **Direct-scan**

- 2b. BT is disconnected.

- 2a. BT connected, begin to scan the barcodes

If BT is disconnected, please back to page #2 and do the pairing procedure again.

2. Memory-scan Mode

1. select **Memory-scan**

2. begin to scan the barcodes

Under Memory-scan mode, enable/disable "Quantity entry" function

Disable "Quantity entry" (default)

1. disable "Quantity entry"
Setting code

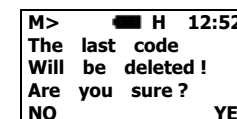

3. press **DEL** to delete the last barcode data

2. begin the scan the barcodes

4. be sure that you want to delete the last barcode.

Enable "Quantity Entry" function,

decide the order of the output data to your device first

1. Q'ty first, then, barcode

3. Enable "Quantity Entry" Setting code

2. Barcode first, then, Q'ty

4. begin the scan the barcodes

When "Quantity Entry" is enabled, decide how to type-in the number.

By button (default)

C1. enable

C2. scan the barcode

C3. Press the ENTER to type the q'ty

C4. press ↓ to choose number, then, press ENTER to confirm

5. Then, scan the next barcode

By scanning the number code

D1. enable

D2. scan the barcodes

D3. Press the ENTER to type the q'ty

D4. scan numeric code (page #5)

5. end by X code, then, be ready to scan the next

Upload data (Memory-scan)

1. press ESC, select Upload

3. After data upload, press ERASE to delete memory data

Switch from Memory-scan to Direct-scan mode

1. switch Memory-scan to Direct-scan mode

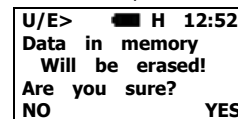

3. begin to scan the barcode

2. BT connected, press START to send data

4. be sure that you want to delete memory data.

Completed!!!

Power-saving Mode

1. Main MENU

3. select Sleep time

2. select Setup

4. press ↓, decide the time to enter sleeping mode

When charging, the scanner won't enter power-saving mode automatically

Transmission Speed

Transmission speed is dependent on your device. In order not to lose data, please choose the correct speed.

1. Main MENU

3. select Output Speed

2. select Setup

4. select the speed type,

RTC (Real-time clock)

1. Main MENU

3. select Time setup

5. select Date Stamp

7. press ESC, select Time Stamp

9. press ESC, select Interval char.

2. select Setup

4. select Stamp

6. Date Stamp is on or off.

8. Time Stamp is on or off

8. select Interval char.

```

Save it ?
NO YES
    
```

Trigger Mode

Trigger always
(You can read the next code, even the data is under transmitting or transmitting completely.)

Trigger standard **(Default)**
(You can read the next code after the data is transmitting completely.)

Multi-language UI setting

(can be changed to different UI by reading the below setting code)

Germany UI

Japan UI

English UI **(Default)**

Spain UI

Keyboard Country

Scan the appropriate country code below to program the keyboard for your country or language. As a general rule, the following characters are not supported by the scanner for countries other than the United States:
@ | \$ # { } [] = / ' \ < > ~

Follow the steps mentioned below to program.

- Keyboard Country setting code.
- "Select Country Code"

Read numeric barcode (according to country code table).

Country/ Language	No.	Country/ Language	No.	Country/ Language	No.
U.S.	10	Netherlands	26	Switzerland French	45
Latin America	11	Hungary	27	Switzerland German	46
Brazil	12	Italian	28	Sweden	47
Belgium	20	Icelandic	29	Turkey F	48
Bulgarian Latin	21	Norway	30	Turkey Q	49
Denmark	22	Poland	41	Japan	71
Finland	23	Portugal	42	Korea	72
France	24	Russia	43	Thai	73
Germany	25	Spain	44	Vietnam	74

How to append a "prefix" or a "suffix" to the barcode data

prefix

suffix

1. Scan above configuration code for Prefix or Suffix
2. Enter the required values (right, numeric barcode) for Prefix or Suffix using the hex values for the desired HEX values from Prefix & Suffix TABLE
3. Then, end by scanning Code X (below, right)

- * The max. of special characters is 5.
- * When you append 1~4 required values for Prefix or Suffix, it must end with Code X.
- * It doesn't need Code X, if you append 5 values to barcode data.

How to delete Prefix or Suffix

1. Scan above configuration code for Prefix or Suffix
2. Enter the "0" "0" (above, right)
3. Then end by scanning Code X (below, right)
