How To Assist RGV Locate The Product In The Unmanned Warehouse?

With the trend of AI industry 4.0/5.0 and factory globalization, the industry is rapidly reforming, and more manufacturing companies are developing rapidly, and intelligent warehousing and logistics have become indispensable.

In the industry 4.0/5.0 unmanned handling robot market, in addition to the AGV forklifts we often talk about, RGV trolleys also play its role in the automated warehouse logistics system.

RIOTEC developed mini Fixed-mount barcode scanner which assists RGV (Rail Guided Vehicle) to locate the product through scanning the barcode, and then the robot arm picks up the product in unmanned warehouse.

- Compact size: 34.5 x 43.6 x 15.6 mm
- Easy installation & Quick scanning
- Presentation mode & triggered by command supported

If you like to know more about mini Fixed-mount scanner, please contact us any time. We will provide the related product information to you soon.

Best Regards,
